PROFESSIONAL SUMMARY

Frontend-focused Full Stack Developer with 5+ years of experience and 4+ shipped projects across healthcare, fintech/blockchain, IoT, and EdTech domains. Specialised in building real-time, performance-optimised interfaces with React.js, Next.js, and TypeScript — with a track record of cutting load times by 30%, reducing manual workflow overhead by 60%, and designing reusable component systems that scale across teams. Recent work spans blockchain dApps, Telegram Mini Apps, and AI-assisted development tooling.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js (SSR/SSG/ISR), Node.js, Express.js, HTML5, CSS3

State & Data: Redux Toolkit, TanStack React Query, SWR, Context API, REST APIs, WebSockets (Socket.io)

UI & Styling: Tailwind CSS, Framer Motion, Chart.js, Responsive Design, Component-Driven Architecture, Design Systems

Performance & Quality: Code Splitting, Lazy Loading, Caching Strategies, SEO Optimisation, Jest, Web Vitals

Specialised: Blockchain / dApps, Telegram Mini Apps, Real-time Dashboards, AI-Assisted Development

Database & Tools: MySQL, MongoDB, Git, GitHub, Postman, Vercel, Swagger, CI/CD pipelines, Agile/Scrum

PROFESSIONAL EXPERIENCE

Kode Creators Pvt. Ltd. | Software Engineer *Dec 2025 – Present*

Vadodara, India

- Lead frontend development of **healthcare booking and practice-management platforms** using React.js, TypeScript, and Tailwind CSS, serving clinical workflows for multiple provider organisations.
- Architected **scalable admin panel architectures** with role-based access control, advanced data tables, and dynamic views — improving operator throughput on high-volume workflows.
- Migrated server-state management to **TanStack React Query**, introducing intelligent caching, background refetching, and optimistic updates that reduced redundant API calls and improved perceived performance.
- Leveraging **AI-assisted development tooling** to accelerate delivery cycles while maintaining code quality through reviews, typing, and consistent patterns.
- Established a reusable component library and conventions adopted across multiple modules, accelerating the delivery of new features by the wider engineering team.

LedgerLine Technologies | Frontend Developer, *May 2025 – Nov 2025*

Vadodara, India

- Built **blockchain dApps and Telegram Mini Apps** with React.js and Next.js, delivering decentralised solutions and innovative mobile web experiences with a focus on performance and security.
- Developed real-time, data-driven trading interfaces with **WebSocket feeds and TradingView charts** for live order books, trade history, and price tickers — handling sub-second updates without UI jank.
- Reduced **page load time by ~30%** through bundle analysis, dynamic imports, image optimisation, and route-level caching.
- Implemented **secure auth flows**, including JWT-based session management, protected routes, and role-based access for trader and admin views.

- Designed an extensible UI component system that standardised forms, modals, and data displays across product modules.

Kode Creators Pvt. Ltd. | Frontend Developer *Sep 2022 – May 2025*

Vadodara, India

- Delivered a scalable **healthcare booking and POS platform** using React.js, Next.js, and TypeScript — used daily by clinic staff for appointments, billing, and patient records.
- Owned data-fetching architecture using **SWR with stale-while-revalidate patterns**, reducing API load and giving users near-instant navigation between cached views.
- Built admin dashboards with real-time appointment and transaction tracking, replacing manual reconciliation processes.
- Applied **React Suspense, lazy loading, and memoisation** to keep the bundle lean as the application scaled to dozens of routes and modules.
- Partnered closely with backend and product in Agile sprints to clarify API contracts and ship features within tight release cycles.

ImageIO Knowledge Solutions Pvt. Ltd. | Full Stack Developer *Sep 2021 – Aug 2022*

Vadodara, India

- Built end-to-end **Academic ERP modules** with React.js, Node.js, Express.js, and MySQL — covering student lifecycle, course enrollment, and administrative workflows.
- Integrated **HDFC payment gateway** for automated fee collection, reconciliation, and transaction status tracking, eliminating manual finance work for the institution.
- Tuned MySQL queries through indexing and schema refactoring, **significantly improving report-generation speed** for admin users.
- Implemented role-based access control across admin, faculty, and student interfaces with secure authentication middleware.
- Authored RESTful APIs with input validation, structured error handling, and Swagger documentation for downstream consumers.

PROJECTS

Workflow Management System — *React, Next.js, TypeScript, Node.js, MongoDB*

- Internal enterprise tool to orchestrate complex workflows, task dependencies, and automated notifications — **reducing manual overhead by 60%**.

Core Health Physiotherapy Platform — *React, Express.js, MySQL, Tailwind CSS, Redux*

- Full-stack patient management and booking platform for physiotherapy clinics with real-time appointment scheduling, patient records, and billing.

Gas Flow IoT Dashboard — *React, TypeScript, Chart.js, WebSockets, Node.js*

- Industrial IoT dashboard for **real-time gas flow monitoring** with live data visualisation, alerting thresholds, and historical reporting.

SaaS Productivity Tool (Side Project) — *Next.js, TypeScript, Tailwind CSS, Resend, Vercel*

- Lightweight SaaS productivity tool with **AI-assisted task management**, time tracking, and team collaboration features.

EDUCATION

Bachelor of Engineering, Computer Engineering, 2017 – 2021

Vadodara Institute of Engineering, Vadodara, Gujarat
